## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 8, 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Jung, Korean Patent document 2000-0004766.

Jung has the frame 8, support rail 18, and decoration cover 42. The cover is “configured and dimensioned” for concealing *from the outside* the opening and closing mechanism in certain venting positions of the roof. As applicant’s claims are open ended as to where or in what positions of the sunroof panel the concealing is done, the claims are anticipated. It appears that applicant’s cover partially conceals the operating mechanism from the inside in the closed position.

See body frame 40/48, fixation parts 46, 26, and lateral surface of rail 18 at 22, claim 2.

See rib 40, claim 3.

As to claim 4, see fixation parts 46 extending from an upper portion of body frame 40/48 and being adjacent each other, claim 8.

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3612

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 5-7, 11-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jung in view of Kohlpaintner et al..

Jung uses bolts and screws for fastening. It would have been obvious to one of ordinary skill to provide in Jung snap fastening via a fixation part 5' as taught by Kohlpaintner et al.. The upper and lower members of the member 5' snap onto the rail 18 as an obvious expedient to increase securement force. Further see immediately below.

As to claim 6, Kohlpaintner et al. teaches snap fastening via a barb at 10' and such is also common knowledge in the art in order to remove the necessity to use adhesive.

As to claim 7, use of the snap connector 5' in conjunction with dual clips is deemed to be of common knowledge in the art, obvious to use here to improve securement.

#### ***Response to Arguments***

5. Applicant's arguments filed 3/25/2005 have been fully considered but they are not persuasive. Please see the rejection above.

The argument that the member 42 of Jung, also listed as cover 40 in figures 4-6 and number 24 in figures 2-3, is disqualified from reading on the claims because it is a combining member is traversed. The member 42 is mounted on member 18 by number 42, the claims do not preclude this.

The argument that the cover has a predetermined length and width for concealing is not convincing. All three dimensional structure has length and width.

Kohlpaintner et al. was cited to teach snap fastening, an alternative to the bolted fastening of Jung at 44/46. This does not increase the number of components.

*Allowable Subject Matter*

6. Claim 9 is allowed.

*Conclusion*

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
